Tires = any dealer

Tachometer = scitsu.com

Handlebars = OE,VI, or any dealer

Any parts that are NOT on this list will have to be fabricated or adapted by you or your builder as there are no specific parts for that application. Items such as rear sets, shift & brake linkage, seat cover, inner fender panel, and chain guard would fall into this category. Some parts will be available at your local motorcycle dealer or on the internet. Tires, carb and handlebars would be in this group. Ebay or Craig's list may have some of the parts you need. Don't be afraid to ask questions about what parts to purchase. You can always call OSSA Engineering for help.
